

SEA Abstract Scoring Rubric (Research Category)

Analytic Scores

	Not present	Incomplete/ not clear	Present, clear, complete
score	0	1	2
Is the study's research question clear and relevant?			
Does the study add anything new to current knowledge and understanding? Are topic, methods, findings novel?			
Does the study test a stated hypothesis?			
Is the design of the study appropriate to the research question?			
Do the study methods address key potential sources of error, bias and impact of variables?			
Were analytical methods appropriate (e.g. statistical analysis) and applied correctly?			
Is there a clear statement of findings?			
Does the data support the authors' conclusions?			
Are there any conflicts of interest or ethical concerns?			
Is the writing coherent and effective?			
Total analytic score Add to holistic score, below			

Holistic Scores

Is the topic interesting? Please rate your interest in hearing it as an oral presentation (0-10 scale where 10 is the best)

Example:

- 0 – Topic not novel
- 5 – Not new but good topic and technique
- 10 – Very interesting, innovative and well-conducted study

SCORE (0-10)	
---------------------	--

Impact/relevance – would you incorporate findings into your program’s teaching or research approach? (0-10 scale where 10 is the best)

Example:

- 0 – Study does not need to be repeated
- 5 – Some value in using research techniques
- 10 – Very compelling results that propel us toward change

SCORE (0-10)
